

# A full list of more than two thousand editions of A. Leslie Scott's 335 longer western stories over time

ANDERS N. NILSSON, Nordmaling, Sweden

[Version 29 January 2025]

My current best estimate of Alexander Leslie Scott's (1893-1974) total production of longer western stories, i.e. novellas, novelettes and novels, lands on 335 different stories published in 2,017 editions between 1930 and 2024. The many editions in combination with their more or less continuous publication over almost a century make the output of this author a very interesting study object. Moreover, the distribution of these stories via pulp magazines, paperbacks, library hardcover books, and eBooks, makes Scott's output useful for quantifying the transitions from one medium to another over time.

Most of the material here reported on has been gathered from the three previous parts of the Leslie Scott bibliography I've been working on for some time together with James Reasoner. The timing of this work is good as 2024 is fifty years after the death of Scott in October 1974, and a bibliography is a suitable way to celebrate his memory. The first part of the bibliography had its focus on the author and his two major Texas Ranger heroes Jim Hatfield and Walt Slade (Nilsson & Reasoner 2024). The focus was here primarily on the origin of these ranger stories in the Texas Rangers and Thrilling Western pulp magazines, and their subsequent reprinting and remaking in paperbacks published by Popular Library and Pyramid Books. Vintage library hardcover books were also covered, including an attempt to sort out Scott's texts behind house names like Jackson Cole, Buck Billings, and Tex Holt.

The second part of the bibliography covered mainly reprints of Scott's western books outside of the US up to about 1980 (Nilsson 2024a). Besides the UK, Australian, and Canadian reprints using the original language, the many translations of Scott's books in especially Scandinavia and the Netherlands were here listed. Reprints from after 1980 were listed in the third part of the bibliography (Nilsson 2024b), including mainly Norwegian paperbacks and a mix of hardcover and softcover large print editions from USA and the UK. Also the eBooks published up to 2024 were included.

Added to the already listed editions in the three earlier parts are here chiefly the stories longer than short-stories from other pulp magazines than Texas Rangers or Thrilling Western present in the FictionMags Index (Stephensen-Payne 2024). Also, occasional additions of previously overlooked editions from other categories are here included.

## A brief history of Scott's publishing

Besides a few railroad stories Scott's early carrier as pulpster started in Dell's magazine *Western Romances*, Dell's attempt to compete with the more famous *Ranch Romances*. Here Scott got nine novellas and novelettes published in 1930 to 1932. His more romantic stories were after 1933 published chiefly in *Thrilling Ranch Stories*, part of the "Thrilling Group", and including also *Thrilling Western* magazine, where his normal western stories were placed from the start. He contributed with occasional romantic stories up to 1951, some of them also in the *Golden West Romances* magazine.

Scott's first Jim Hatfield story, *The Lone Wolf Rides*, appeared in the October 1936 issue of Texas Rangers, and in the same year he did get his first two hardcover books published. In 1937 his first books outside of the US were published by Cassell in the UK. Writing as Bradford Scott, his first Walt Slade story, *Knight of the Silver Star*, appeared in the March 1940 issue of Thrilling Western. In the same year he started to contribute to the UK edition of the journal.

The first text by Scott seen published in translation is the Swedish serialized edition of *The Arizona Hawk* in 1947 in the weekly adventure magazine Lektyr. More translations did not follow until Scott's stories started to appear in American paperbacks, of which the first one was *Guns of Mist River*, published by Popular Library in 1950. The first Pyramid paperback was published in 1951 as #26 *Arizona Ranger* by A. Scott Leslie. The first paperback translations appeared in 1954 in Norway, starting with Stjerne-bok #71 based on *Tombstone Trail*, printed in original by Pyramid in 1951 as #36.

The last of Scott's stories published in a US pulp magazine was *Walt Slade Rides Trail* in Thrilling Western, November 1955. The UK pulp editions of Scott's stories, however, were published up to 1960. After that all new stories by Scott were published as Pyramid paperbacks, with the last one not representing a reprint being *Border Daring*, #T2893 from 1973. This edition has been followed by fifty years of reprinting, as paperbacks, or large print hard- or softcover books in the US and UK. The first eBook edition of Scott's novels appeared in 2009, and I guess there are many more to come.

### Some numbers and trends

The following list includes 2,017 editions of 335 different western stories, longer than short-stories (Table 1, Appendix 1). Roughly half of all editions, or 990 in the original language, and the remaining 1027 translated to other languages. Besides two editions serialized in weekly magazines, all translated editions represent paperbacks. The editions in the original language have a more equal distribution over paperbacks, magazines, and hardcover books, and including also 36 American eBooks. The proportion of hardcover books is higher among the combined British, Australian, and Canadian editions, than in the US editions.

Table 1. Distribution over regions and media of the known editions of the western stories of A. Leslie Scott longer than short stories. Media coded as: (eb) eBooks, (hc) hardcovers, (ma) magazines, and (sc) softcover books.

<b>Region</b>	<b>eb</b>	<b>hc</b>	<b>ma</b>	<b>sc</b>	<b>Sum</b>
US	36	92	222	257	607
AU CA UK	0	118	140	125	383
English	36	210	362	382	990
Translated	0	0	2	1025	1027
<b>Sum</b>	<b>36</b>	<b>210</b>	<b>364</b>	<b>1407</b>	<b>2017</b>

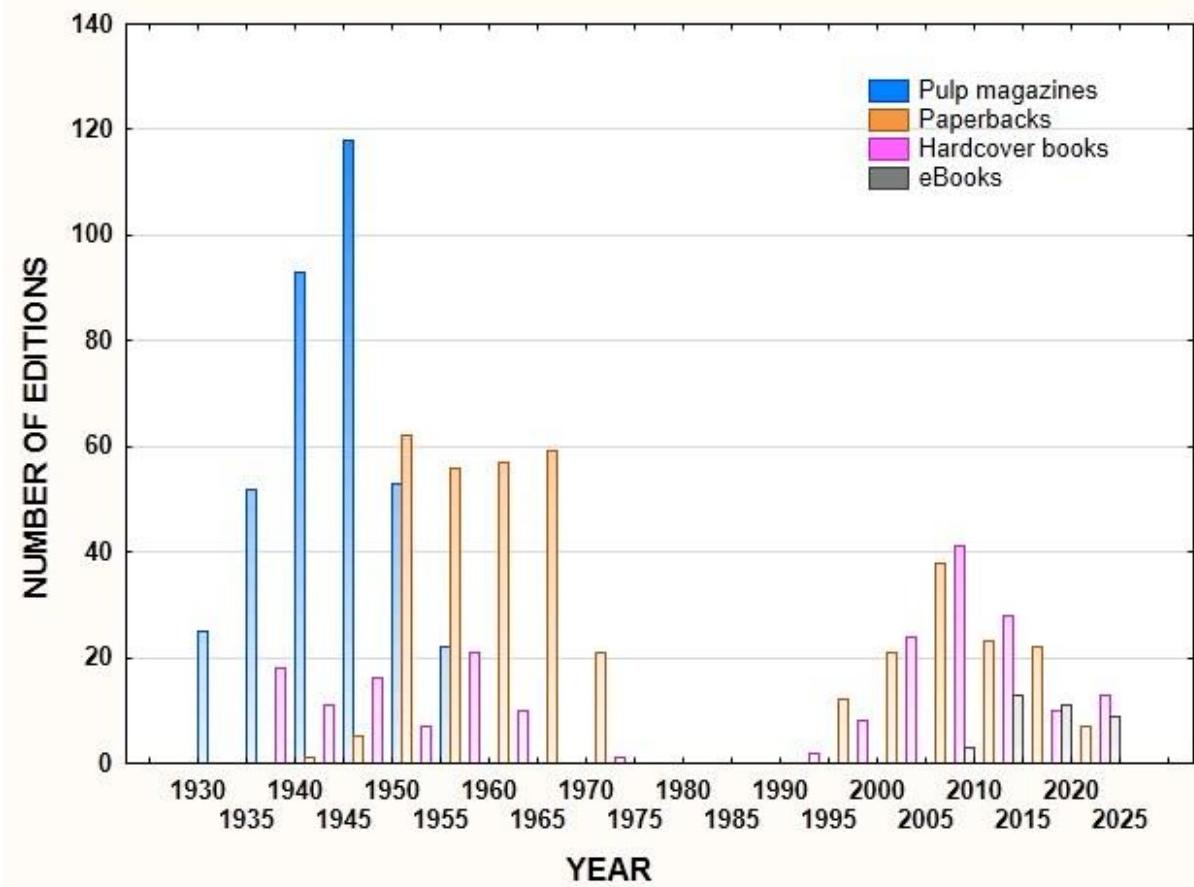

Figure 1. Number of editions in English of western stories longer than short stories by A. Leslie Scott in 5-year intervals 1930-2024.

Looking at the editions in English, the initially dominating pulp magazines peaked in the late 40's and disappeared in the late 50's (Figure 1). The paperbacks started to dominate in the early 50's and then disappeared in the late 70's, only to return as large print editions in the late 90's. The hardcover editions were almost absent from the late 60's to the early 90's. From the late 90's they shared the market with the paperbacks as the large print editions peaked.

The translated paperbacks peaked in the early 60's, and disappeared in the 90's (Figure 2). Their return after the millennium shift is entirely due to the Norwegian double volumes that still are being published by Cappelen Damm.

All 335 stories were first published in the English language. In the strict sense a number of Walt Slade novels were in Scandinavia translated from manuscripts and published as books slightly before the corresponding US editions (Nilsson 2024c). The few stories known only from British editions will most likely in the future be possible to match with US editions. Only 148 stories are available as translation to one or more other languages, meaning that 187 stories are available only in the original language. A majority of the untranslated stories are only known from the pulp magazines, but including also more than 70 stories available also as books.

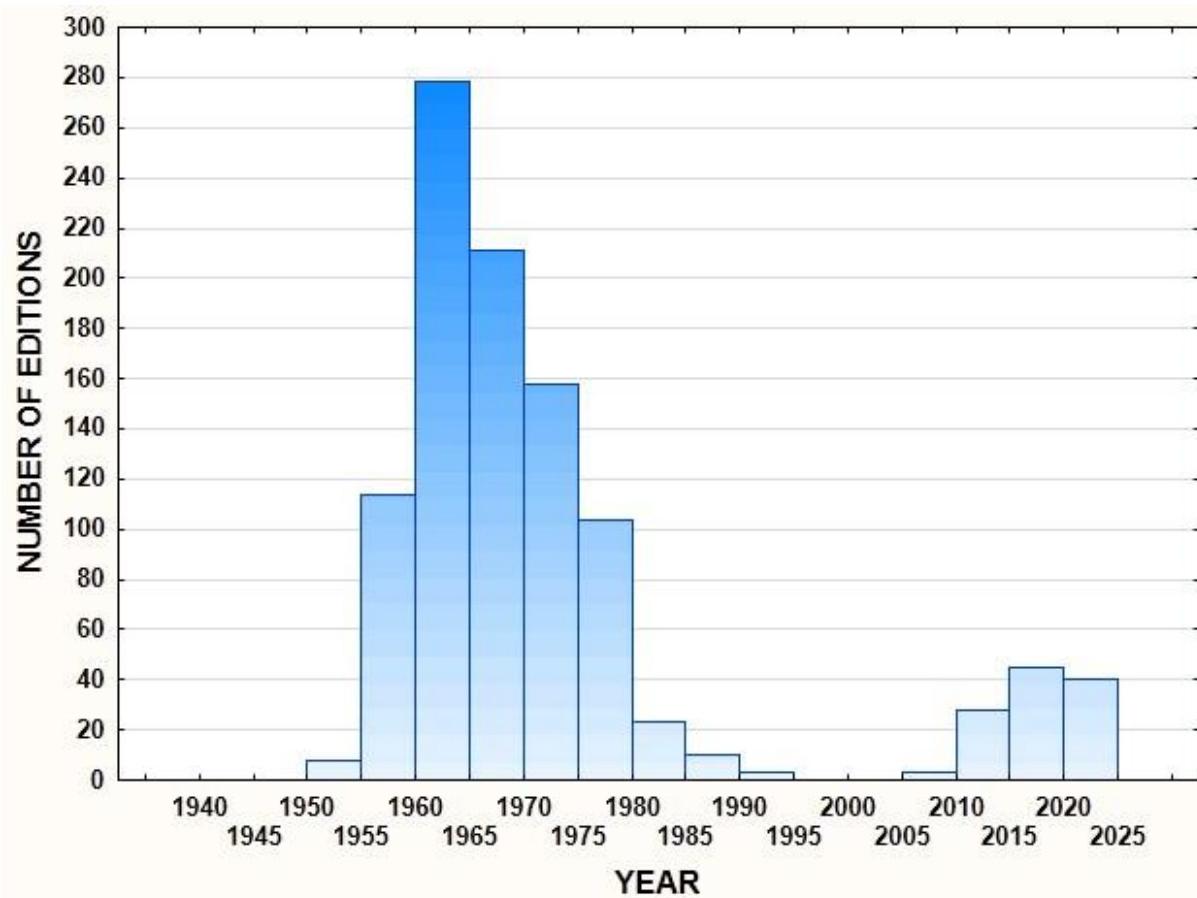

Figure 2. Number of translated paperback editions of western stories longer than short stories by A. Leslie Scott in 5-year intervals 1940-2024.

208 stories were first published in the pulp magazines, whereas 104 stories first appeared as paperbacks, and only 23 as hardcover books. Most likely, more of the stories first published as books will be possible to match with some of the pulp editions still poorly known when it comes to contents.

The number of editions per story varies from one to 23 (Figure 3). The 63 stories known only from single editions and the 73 ones known from two editions chiefly represent poorly known pulp or vintage hardcover editions. More than 20 editions are known of the *Moon Valley Trail* (23) and *The Big Bend Feud* (21) stories. Both stories characterized by linking pulp editions with those in paperback, in combination with some large print reprints and many translations.

The reason behind the seemingly bimodal distribution of the number of editions per story appears more clearly after the separation of English and translated editions (Figure 4). Besides the 187 stories without translations, the lower peak of six to eight editions per story is chiefly due to translated editions, and especially the coordination among the Scandinavian countries. On the other hand, the more evident one to four editions peak is almost totally due to editions in English.

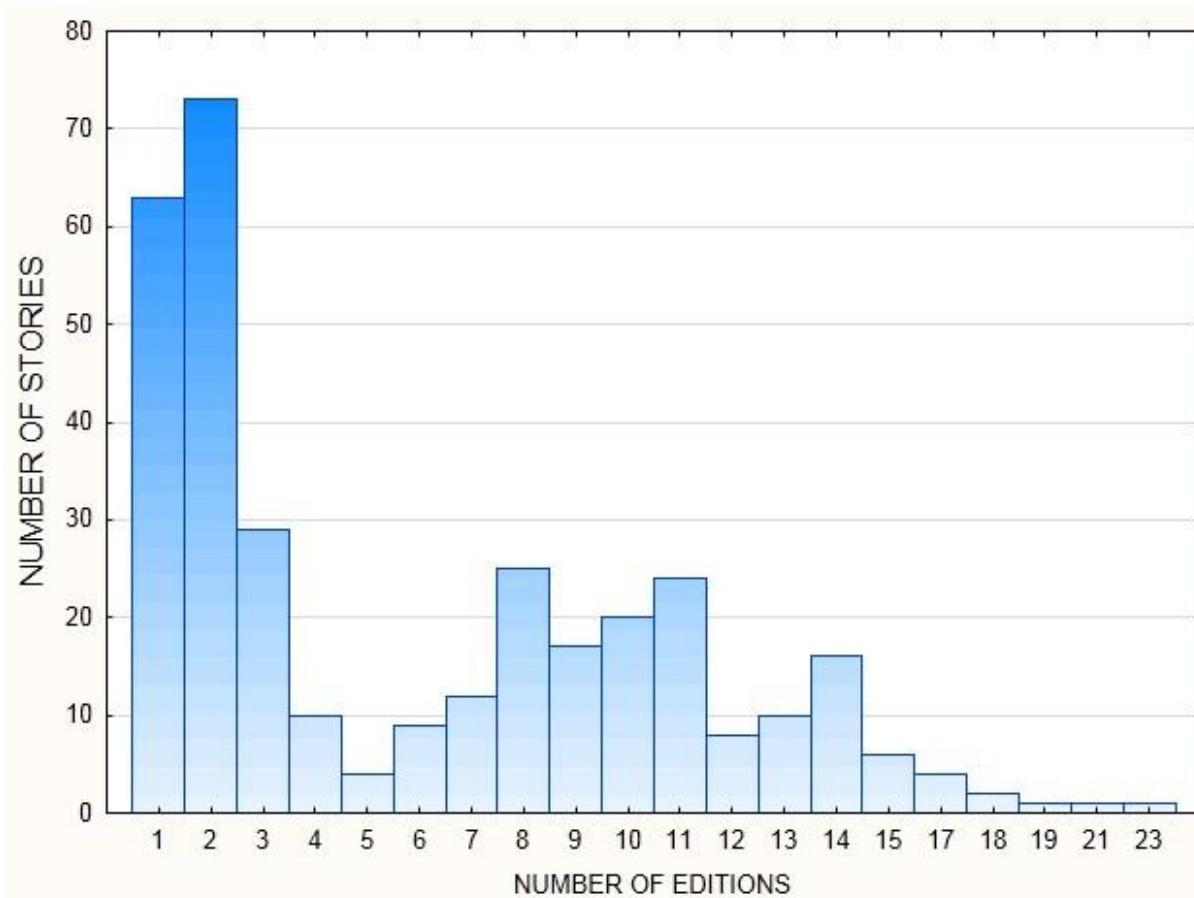

Figure 3. Frequency distribution of number of editions per story among 335 western stories longer than short stories by A. Leslie Scott, and including all 2,017 editions known. Note that the horizontal scale includes only observed values.

### Some final words

The Leslie Scott bibliography is also of great interest for a more detailed and quantitative study of his frequent re-use of pulp stories as paperbacks or library hardbacks. I hope to be able to return to this issue at some later time when more of his pulp stories have become better known by content.

After looking so long in vain for studies of Leslie Scott in books on western literature, I can now add two more works to the printed sources listed in my three earlier parts of his bibliography. First, a big hand to Wildside Press for their recent reprint of Nick Carr's 1989 book on *The Western Pulp Hero*. Here the two Texas Ranger characters Jim Hatfield and Walt Slade each are presented to the reader on a couple of pages. Not much about Scott though. On the other hand, Scott's style of writing is compared to that of Tom Curry by Ron Goulart in the western chapter of his 1972 *Cheap Thrills* book, later reprinted as *An Informal History of the Pulp Magazine*. Curry is here cited for the opinion that Scott created the format used in the Hatfield stories: "He was, I think, inspired by the Lone Ranger," says Curry of Leslie. "He called Hatfield the Lone Wolf, and instead of Silver, his horse was called Goldie."

My best thanks to James Reasoner, Steve Myall, and all others that have helped me in gathering all this information on the western stories written by A. Leslie Scott.

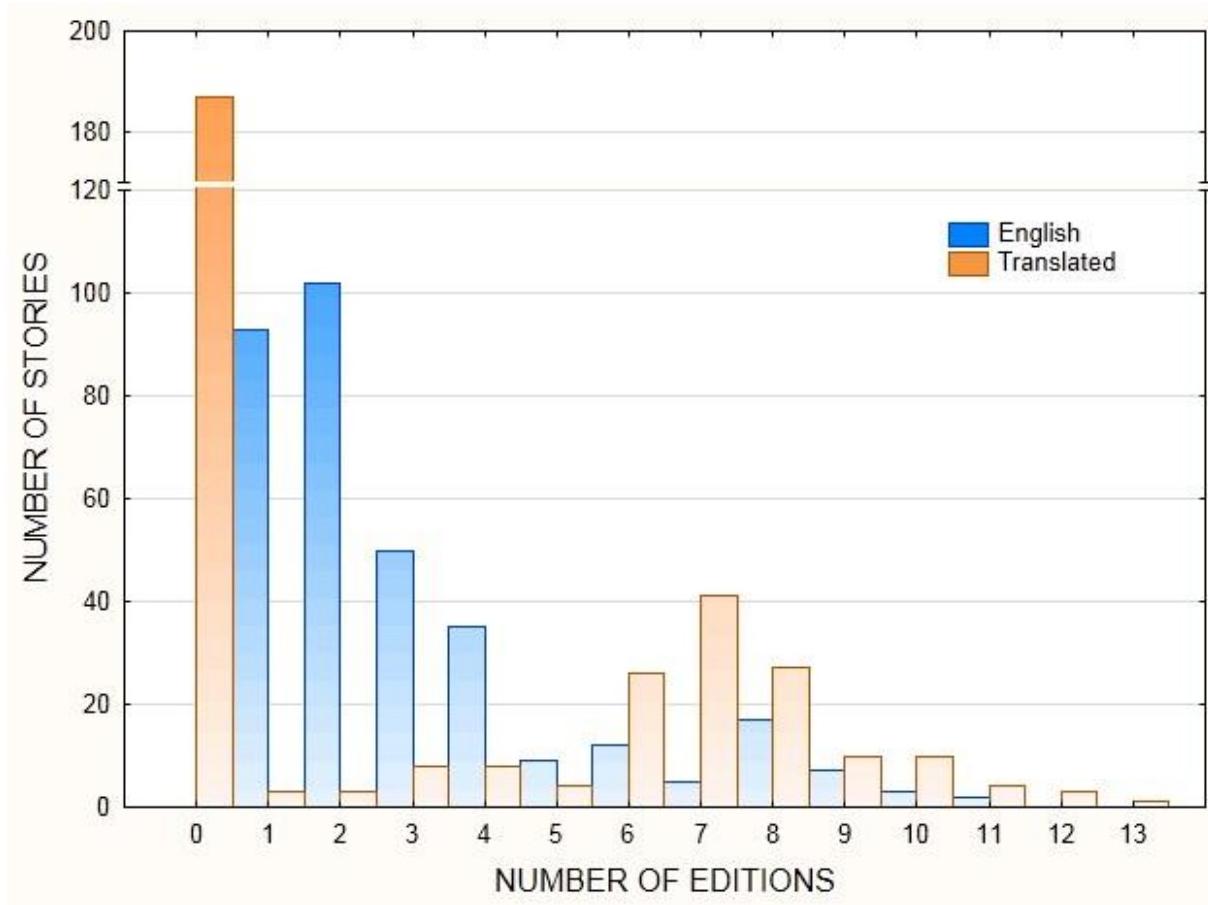

Figure 4. Frequency distribution of number of editions per story among 335 western stories longer than short stories by A. Leslie Scott, with separate bars for the 1027 translated and 990 editions in English. Note the cut in the first bar.
